Do you see what I see? Attention to detail is important with this initiative. A specified number of cupcakes are iced and placed together in a particular shape. The cupcakes are meticulously decorated. Each team must recreate the design with the supplies they are given. Each team has 3 tokens, which offers 3 chances to view the model and a referee will collect the tokens for each view. The teams have an allotted amount time to complete their creation. The winner is determined by the similarities to the original design.

Ever been stuck in traffic? Sure, you have! Wished you could move the cars out of your way? Here's your chance....Rush Hour takes the classic picture sliding puzzle to a new level of problem solving. DUCK HUNT

Chaos with direction. The group is divided into teams. The teams will select a blindfolded person, guide and direction attendants. Each team will choose 2 tools—a fishing tool and a guide tool. The blindfolded members kneel around a kid's pool filled with water, ducks and obstacles. The guide will direct the blindfolded teammate to the correct duck to capture in the bucket. The direction attendants may assist the guide with duck location. Each team has 10 minutes to complete the activity. Each team reports to the facilitator once all of their ducks are rescued from the pool. The concept is simple, but a challenge.

GINGERBREAD HOUSE

For the holiday season, decorate your own gingerbread house. Divide the group into teams. Each team has a gingerbread house kit along with some extra decorating goodies. GEO-CACHE

Geo-caching is an outdoor activity in which the participants use a Global Positioning System (GPS) receiver to hide and seek containers (called "geo-caches" or "caches"). A typical cache is a container containing a log-book and/or items for trading (we suggest company-branded products or trinkets). Geo-caching is most often described as a game of high-tech hide and seek.

Join the fun of a high-tech, treasure hunt on 55-acres of a scenic estate.

Geo-caching is a fun group activity fostering a strong sense of community and support for the environment. Or you can gear the caches toward your business whether it is a product launch or guiding principles.

What's Included:

GPS receivers Bandanas Containers

How it Works:

The group has the option of a 10 to 20 clue hunt depending upon time allowed for the event. The group is divided into teams and each team will receive a team color, bandana and GPS receiver. Once the teams are divided, the facilitator will ask for team captains. The facilitator will meet with the captains to discuss the rules. Then, the captains are responsible for repeating the instructions to their respective team members. The teams may want to divide the responsibilities for the hunt: guide, scribe, navigator, organizer, and riddle master. Each team starts with a waypoint, a marked location on the property, and the receiver only gets you within about 15-20 meters away from the marked waypoint. The cache is hidden from geo-cachers to increase the challenge and fun and team members work together to solve the caches clues. As they solve their caches, team members make notes of the places and items they have found at each waypoint. The first team back at the start with the most correct caches wins!

At the conclusion, the chef will determine the winner based on a taste test and with the ingredient cards as written. They will be judged on taste, creativity of team and smoothie name, work space cleanliness, and best overall winner.
